

Call for Abstracts of EcoBalance 2022

The 15th
Biennial International Conference on EcoBalance

Date : 30 Oct. – 2 Nov., 2022

Venue : Fukuoka convention center, Fukuoka, Japan

“Shifting Paradigms with Life Cycle Thinking”

The organizing committee is pleased to invite you to submit abstracts for EcoBalance 2022.

The conference theme has been set as:

“Shifting Paradigms with Life Cycle Thinking”

Living within planetary boundaries is one of the ultimate goals towards sustainability. Diverse activities across the world in various fields: industry, policy, finance and science particularly, have been creating strong momentum towards carbon neutrality. We believe that life cycle thinking has the power to progress the required paradigm shifts by connecting such activities with a bird’s-eye view of the complex systems that contribute nature and human society. We would like to create opportunities to advance practice and science, and to connect participants and partner with them to promote the changes needed to ensure a bright future.

We welcome practical and theoretical contributions including applications, ideas, methods, indicators, databases and tools that aim to contribute to the achievement of sustainable society as their ultimate goal.

Abstract must be submitted in plain text and **should not exceed 300 words**. The abstract submission deadline is **31 March, 2022 (JST)**. The submission system is currently in preparation, and an announcement will be made once it opens. If you wish to be updated, please ask our secretariat (ecobalance@ilcaj.org) or fill the form (<https://forms.gle/8kLbWEwPaeN6kHS89>) to add you in the list of interested people.

On behalf of the organizing committee

Masaharu Motoshita, Ph.D.

Chair of EcoBalance 2022, The Institute of LCA, Japan

National Institute of Advanced Industrial Science and Technology (AIST)
